STATEMENT

for the following products:

BIOLAN GREYWATER FILTER LIGHT

A properly dimensioned, installed and operated Biolan Greywater Filter light wastewater system meets the limit values for total phosphorus, total nitrogen and organic material in grey wastewater in accordance with the Finnish Environmental Protection law (527/2014) and the Household Wastewater Decree (157/2017).

Purification efficiency based on measurements:

Parameter	Average purification efficiency*
Organic material (BOD ₇)	87 %
Total Phosphorous (P)	80 %
Total Nitrogen (N)	29 %

*Average measured values, purification efficiency depends on the quality of grey water

Our products have been manufactured in Finland according to the quality management system and quality instructions. The manufacturing is certificated according to the quality management standard ISO 9001:2015 and environmental management standard ISO 14001:2015.
